In the claims:

Please amend claim 1 as follows:

Ba

- --Claim 1 (Amended). A <u>non-aqueous</u> coating composition comprising:
- (A) 50 to 80 weight percent, based on total resin solids of (A) and (B), of an acrylic polyol comprising the polymerization product of:
 - (i) 20 to 70 percent hydroxy functional acrylate monomers comprising:
 - (a) 0.5 to 15 percent of acrylate or methacrylate in which the esterifying group is the residue of a glycidyl group and includes a branched alkyl group;
 - (b) 5 to 40 percent of acrylate or methacrylate in which the esterifying group is a hydroxy ester having one or more ester groups; and
 - (c) 0 to 40 percent of one or more hydroxyalkyl acrylate or hydroxyalkyl methacrylate monomers different from (a) or (b);
- (ii) 30 to 80 percent acrylate monomers without functional groups reactive with isocyanate; and
- (iii) 0 to 5 percent unsaturated acid monomer; wherein the percentages of each of the acrylic polyol constituents is based upon total resin solids weight of all the acrylic polyol constituents;
- (B) 20 to 50 weight percent, based on total resin solids of (A) and (B), of a curing agent reactive with hydroxyl groups;

the percentages based on weight of total resin solids of the composition; and

(C) diluent consisting essentially of organic liquid; wherein the volatile organic content of the coating composition is less than 4.0 pounds per gallon in a non-aqueous composition. --

Please cancel claim 4, and please insert in place thereof the following new claim:
